## **David Tremblay Joins GWWO as Construction Administration Team Leader**

---

---

David W. Tremblay, LEED AP has joined GWWO, Inc./Architects as construction administration team leader.

David has twelve years of experience as an architect, with a significant background in educational and institutional projects. He most recently served as project architect and design integration manager for CSD Architects, where his primary role was in construction administration. He was also a member of the firm's team focused on product and materials research, resolving technical and contract issues, and specification writing.

In his new role with GWWO, David is responsible for oversight and coordination of the firm's construction administration team. He will also conduct quality assurance/quality control checks on documents prior to construction and act as a firm-wide resource for construction related matters.

"David's strong technical and leadership skills, coupled with his unique understanding of the complete project delivery process, make him an ideal choice to lead our construction administration department," says GWWO president and design principal Alan Reed. "His strategic involvement in projects throughout the design phases will enhance our team coordination and client service during construction."

David holds both Bachelor of Architecture and Bachelor of Science degrees from Ball State University. He is an associate member of the American Institute of Architects and a LEED Accredited Professional.

GWWO is a full service architectural firm that specializes in the planning and design of cultural and educational facilities, with emphasis on quality design that is both evocative and inspirational. Current projects include a new Visitor Center for Fort McHenry National Monument & Historic Shrine in Baltimore, MD; the new West Village Commons Building at Towson University in Towson, MD; planning for the renovation and expansion of the Children's Museum & Theatre of Maine in Portland, ME; and the design of renovations to The Brafferton at the College of William and Mary in Williamsburg, VA.
